KISTI Campus

Building the IoT, the DIY Way

Easy and Fun, Just follow quick recipes

Create your own IoT devices

From scratch (Programing language skill preferred, Not mandatory)

- Group activity based Hands-on class
- How to works lots of sensors, actuators
- How to monitor and control your own IoT devices

Make your IoT application

IoT Home Assistant

Self-watering Flower Pot

Remote Light Switch

Smart Window Opener

Devices

LED / Button / Speaker

Temperature / Humidity

Air quality Sensor

Moisture Sensor

Relays

Ultrasonic Sensor

Water-level Sensor

GPS Module

Wifi Module

Servo motor
